Structure de
formation
Faculté
d'Économie

Langue(s)
d'enseignement
Anglais

Présentation

The Summer School in Sustainable Development at the University of Montpellier offers students the unique opportunity to learn about the major challenges currently facing the planet.

The courses cover most of the 17 Sustainable Development Goals outlined by the UN and aim to explain not only the theoretical underpinnings of the problems we face but also the practical solutions that can be adopted.

All courses will be taught in the English language by a team of professors specialized in the field. Students will work together on group projects, according to their particular interests, which will be presented to the class. Students who would like to improve their French, whatever their level, can also take language courses.

Admission

Conditions d'admission

All students must fill out an online application between January 1st and March 31st. Answers will be sent by April 10th. Students must then pay tuition and fees online by April 30th.

Applications may be found on eCandidat platform of the University of Montpellier

<https://ecandidat.umontpellier.fr/ecandidat>

Droits de scolarité

Students and professionals: €1434

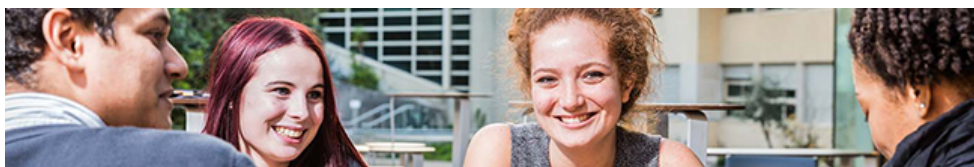

Students from partner universities: €734

This charge includes all classes, conferences, course materials, and access to university services. These fees do not cover other costs, such as transportation, housing and food.

Pré-requis recommandés

Applicants should currently be enrolled in a related undergraduate program or have already obtained their degree. Professionals interested in Sustainable Development are also welcome.

Programme

Organisation

In this program, students will have 3 hours of class on Sustainable Development every morning during the two-week period. These courses will focus both on theoretical knowledge as well as its application in the real world. In addition, students can also take 1.5 hours of French language courses in the afternoon. The rest of the time will be dedicated to visits, conferences, and projects. Students will have access to all university facilities (restaurant, coffee shop, library, study rooms, etc.), as well as Wifi access, to be able to work on individual and group projects.
